**Re Item V**

**Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. The invention relates to an instrument to measure the tension in cables.

Closest prior art is considered to be D1 = ES-A-2 150 365 (cited p.1), wherein a pressure element in the form of a bridge structured for a certain number of cables with certain diameters is used. For different number of cables and different diameters different bridges are used.

Main characteristic of the apparatus according to claim 1 is the use of a pressure element in the form of a cylinder 6 in combination with washers 8 attached as defined in claim 1, resulting in a variable construction permitting to exercise pressure to different numbers of cables, and different diameters.

Such a variable construction is not known nor suggested by the above document or the other prior art documents cited in the search report.

Therefore the subject-matter of claim 1 meets the requirements of articles 33 (2) and 33 (3) PCT.

2. Claims 2 and 3 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
